PAYMENT
METHODS

Implementing Payments for Environmental Services (PES) at scale involves thousands of applications, contracts, field visits and payments across remote territories. The PES Management Tool makes this possible by bringing the entire cycle into one auditable system, from mobile enrolment to bulk payments.

ONE AUDITABLE CYCLE

A TOOL YOU CAN TRUST

DIRECT TO COMMUNITIES

Payments reach beneficiaries through mobile-money, e-vouchers or bank transfers.

SAFEGUARDS EMBEDDED

Consent requirements and protections for sensitive species and ecosystems are built into the tool and contracts.

END-TO-END AUDIT TRAIL

Every stage, from application to payment, is tracked, ensuring that each actor is accountable.

AUTOMATED ALERTS

The system flags missing documents, overlaps and potential non-compliance.

DATA PROTECTION BY DESIGN

Role-based access and secure identity management protect beneficiary information.

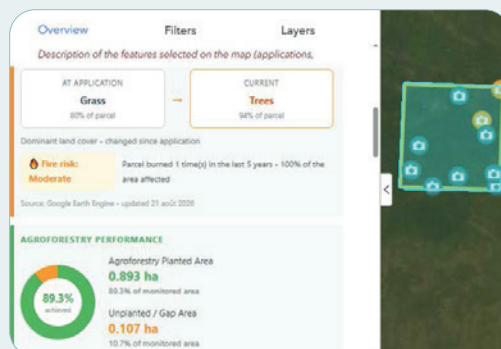

REPORTS DONORS CAN VERIFY

Near-real-time dashboards and maps provide a shared view of implementation.

AUTOMATION FOR RISK-BASED OVERSIGHT

AI-enabled controls flag anomalies and allow compliant cases to be processed in bulk, enabling teams to focus on cases requiring review.

EVIDENCE FROM THE LIVE SYSTEM

Area under contract –
Satellite-verified change

BUILT FOR WHAT'S NEXT

Low-cost, verified data at scale, a traceable project cycle and quantified impact provide a strong foundation for transparent, results-based finance.
