

Risk management and national ownership

Adopted by email on 5 August 2022

EB.2022.18

The Executive Board

1. Takes note of the decision [EB.2016.05](#) on DRC Funding allocation.
2. Takes note of decisions [EB.2016.19](#) and [EB.2017.16](#) on fiduciary measures in high-risk scenarios.
3. Takes note of the request expressed by partner country governments to allow greater leadership and ownership in the implementation of programs.
4. Rescinds its decision on the mandatory use of direct implementation and requests implementing organizations to consider implementation modalities that ensure the highest fiduciary standards but that allow for a greater participation of national governments in the implementation of programs (such as hybrid modalities within a program combining activities implemented directly or nationally based on the nature of the activity and the inherent risks).
